EDUCATION

İzmir Institute of Technology (IYTE)

B.Sc. in Computer Engineering

Sep 2023 – Expected 2028

İzmir, Türkiye

- GPA: 3.21/4.00

Technische Hochschule Mittelhessen (THM)

Erasmus+ Exchange Student, IEM (CCCE)

Apr 2026 – Sep 2026

Germany

- Coursework in **Distributed Systems**, **Network Security**, **Cisco Networking** and **Machine Learning**.

EXPERIENCE

SAP BTP Software Development Intern

abics GmbH

Aug 2026 – Present

Bremen, Germany

- Developing a **Supplier Portal** on **SAP BTP** with the **SAP Cloud Application Programming Model (CAP)** and **Node.js**, backed by **SAP HANA**.
- Building **SAPUI5** front-end applications for supplier-facing workflows.
- Integrating the portal with **SAP S/4HANA** and automating business processes with **nSn** workflows.
- Working in a **Kanban** team, contributing to project planning and coordination.

Product Engineer

İlanPusulam

Sep 2025 – Present

İzmir, Türkiye

- Engineered **microservices** with **ASP.NET** and **Python**, implementing industry-standard **data management pipelines** and **AI** integration.
- Built a high-performance **React Native** mobile app integrating an **AI multi-agent workflow**.
- Managed system security and dependency loads; drove product development with **Agile** methods.

AI/ML Developer

Parayüz

May 2025 – Mar 2026

İzmir, Türkiye

- Engineered a scalable **AWS microservices** backend for an **AI-first platform** that manages and analyzes transactions across multiple bank accounts.
- Designed **multi-agent systems** with **LangChain** and **LangGraph**, enhanced with **RAG** and **NLP** pipelines that turn fragmented financial data into conversational insights.
- Deployed the system on **AWS** with **high availability** and **fault tolerance**.

R&D Software Engineer

Makersan Inc.

Jan 2026 – Feb 2026

Remote

- Built an end-to-end **computer vision** pipeline for crop, leaf and stem detection with custom **YOLO** models, optimizing **mAP** and inference speed.
- Established data curation and annotation standards with **Roboflow** and **Label Studio** to tackle class imbalance and overfitting.
- Worked extensively across the **Azure** ecosystem.

Co-Founder

Dropshake

Feb 2025 – Mar 2026

İzmir, Türkiye

- Directed the technical product roadmap, defining **API requirements** and **reliability standards** for **fintech payment processing**.
- Built responsive, user-centered web interfaces with **Next.js**; led sprint planning and technical documentation.

LEADERSHIP & ACTIVITIES

Co-Founder

Sep 2025 – Mar 2026

Kaira Tech

İzmir, Türkiye

- Turned unfinished **AI and GPT projects** into working products, complementing client businesses' AI visions with precise engineering.
- Managed **development and marketing teams** and oversaw customer service.

Board Member

May 2025 – Jun 2026

IZTECH Software Society

İzmir, Türkiye

- Managed **software project teams** and organized workshops; led technical teams delivering the “**Orange Tick**” service.
- Liaised between university administration, student members and external sponsors.
- Volunteered in social responsibility projects on education, environmental awareness and youth development.

VOLUNTEERING

FIRST LEGO League Team Mentor

Oct 2025 – Feb 2026

IZTECH Software Society × Balıklıova Middle School

İzmir, Türkiye

- Mentored the middle school's **Robova** team for **FIRST LEGO League** through weeks of preparation, meetings and trial runs.
- The team won the “**Rising Stars of the Tournament**” cup (*Turnuvadan Yükselen Yıldızlar*) at the FIRST LEGO League tournament.

PROJECTS

Nara (Experimental programming language) | *Rust*

- Built a **tree-walking interpreter** and **REPL** on a hand-written **parser combinator** library, with precedence-climbing expression parsing, lexical scoping and string interning.
- Implemented functions, **if** / **while** / **for** expressions, lists, f-strings and built-ins (github.com/neonid0/nara).

IZTECH Software Society Website (Community platform) | *Next.js, Supabase, Tailwind CSS*

- Built a modern, minimalist website with a custom **forms** and **events system** for the society, live at yazilimiye.com.

Finax (Fintech hackathon project, **1st Place**) | *Next.js, TypeScript, Tailwind CSS, Radix UI*

- Won **1st place** at the Techathon with a savings-focused fintech platform that uses **community-powered discounts** and **savings campaigns** to help users buy products for less.
- Built the **Next.js** and **TypeScript** front end, including authentication and payment-card flows, a campaign carousel, and the **GreenPoint** sustainability rewards page (github.com/Finax0/finax).
